

ZyDesk | Time

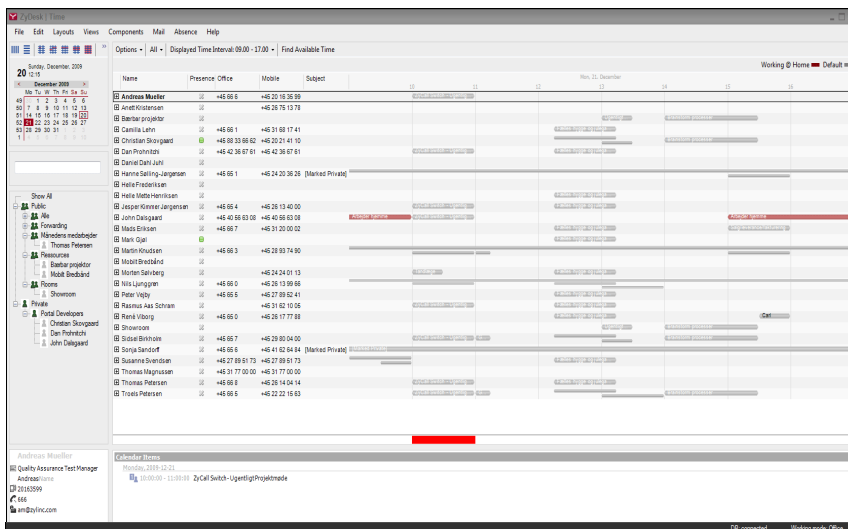

Be more efficient in shorter time

Upgrade your existing shared calendar and get more benefits

ZyDesk Time is a collaboration tool, which collects data from the entire company to your computer.

Thus they will be available to you at the moment the telephone rings or when you want to call. It may be data from calendars, appointments, meetings, etc. that enable you to see who are accessible even before you call.

With ZyDesk Time it is easy to schedule meetings, make calls, send e-mails or entering tasks into your own calendar or that of others.

In this way, Time transforms all company computers to communication centers from where you can search names, accessibility, groups, departments and more.

You will save time with ZyDesk Time, when you need to find colleagues and see whether they are available or when you have to make appointments. You can customize ZyDesk Time to your needs with personal interface, programmable hot keys, etc.

Implementation costs of ZyDesk Time are low; it is intuitive, easy to learn and to use.

With ZyDesk Time it is fast and easy to indicate when you are accessible or not.

ZyDesk Time is a part of Zyline's ZyDesk suite and can be implemented as stand alone or integrated with one or more of the other ZyDesk applications:

- ZyDesk Operator
- ZyDesk ID
- ZyDesk Attention
- ZyDesk Dial
